Chapter 1 Introduction

PDF rendering is handled by pdf.js inside the browser.

Pages outside the viewport are not rendered at all,
which keeps memory flat on mobile devices.

Chapter 1 continued

Each page slot reserves its exact height before paint,
so the scrollbar never jumps while pages stream in.

Chapter 2 Layout

Continuous mode is best for long documents.

Single page mode is better for slides and comics.

Chapter 2 continued

Zoom multiplies the fit-to-width scale.

Tap the percentage button to reset to 100%.

Chapter 3 Storage

Files live in IndexedDB as blobs, on this device only.

Nothing is uploaded anywhere.

Progress and bookmarks are saved on every page turn.
